Summary

Full Stack AI Engineer who builds and ships AI-integrated SaaS products end-to-end, from architecture and development to deployment and production delivery.

Education

JSS Academy of Technical Education

2021 – 2025

Bachelor of Technology in Information Technology, CGPA: 7.51

Noida, India

Experience

Deccanwave Labs (Vesper)

May. 2026 – Present

Founding Engineer

Remote – Hyderabad, India

- Built the backend for a social connection platform with **5+ core features**, including mood-based matching, real-time chat, voice calls, live rooms, and community interactions.
- Engineered Node.js services with WebSockets powering **5+ backend workflows**, including real-time communication, mood matching, coin-based rewards, room moderation, and notifications.
- Implemented real-time calling using **2 communication technologies** (WebRTC and TURN servers) and integrated Firebase Cloud Messaging for reliable push notifications.

Tab It Solutions (Clavel AI)

June 2025 – Mar. 2026

Backend AI Engineer

Remote – Noida, India

- Built an AI-powered VS Code extension using FastAPI, LangChain, LangGraph, and OpenAI, reducing developer troubleshooting time by **60%**.
- Automated infrastructure deployment using Terraform and Ansible, enabling developers to provision and deploy projects through natural-language commands across **2 infrastructure automation tools**.
- Built a React.js and Node.js dashboard for model selection, usage tracking, credit management, and subscription billing, enabling centralized monitoring and management of AI usage.

Envint Services LLP

Dec. 2024 – Mar. 2025

Full Stack Developer

Remote – Noida, India

- Built a full-stack audit and financial reporting SaaS using React.js, Node.js, and DynamoDB, digitizing manual Excel-based audit workflows for **500+ companies** with centralized data management and multi-role access.
- Developed role-based workflows for clients, managers, and senior consultants, implementing **5+ core workflow stages** including dynamic questionnaires, submission reviews, approvals/rejections, feedback, and backend business logic using Node.js and DynamoDB.
- Built interactive analytics dashboards and automated PDF reporting, handling up to **1,000 submissions monthly**, and deployed the application on AWS with EC2, load balancing, and CloudWatch monitoring for scalable and reliable production workloads.

Projects

HireXAI – AI Hiring Marketplace [Live](#) | *Next.js, Node.js, MongoDB, LangChain*

- Built a hiring marketplace connecting candidates with interviewers for mock interviews, career guidance, referrals, and practice sessions, with dashboards for scheduling, bookings, feedback, and earnings.
- Engineered real-time interview workflows using Node.js, LiveKit, and MongoDB, enabling slot booking, live interviews, AI-generated feedback, performance analytics, notifications, and automated penalties.
- Developed AI-powered hiring workflows with LangChain for candidate shortlisting, phone screening, availability checks, interview scheduling, calendar invites, and automated recruiter follow-ups.

Technical Skills

Frameworks: React.js, Next.js, Node.js, FastAPI, LangChain, LangGraph, Celery, RAG, AI Agents

Languages: Python, JavaScript, TypeScript, HTML, CSS, SQL

Databases: MongoDB, PostgreSQL, DynamoDB, ChromaDB, Pinecone (Vector DBs)

Deployment: AWS EC2, AWS S3, Azure Web Services, Docker, CI/CD

AI Tools: ChatGPT, GitHub Copilot, Claude Code, Cursor, V0.dev

Achievements

- Regional Finalist (Top 20) in the 2022–23 Imagine Cup hackathon conducted by Microsoft.
