Summary

Full Stack AI Engineer building and shipping AI-powered SaaS products end-to-end, with expertise across product architecture, development, AI integration, and production deployment.

Experience

Deccanwave Labs

May. 2026 – Present

Founding Engineer – **Jameendar** (AI Real-Estate Marketplace)

Remote – Hyderabad, India

- Building Jameendar end to end; shipped **Bhoomi AI**, a conversational search assistant (**Vercel AI SDK**) that parses natural-language queries, runs semantic search over listings, and streams tool-call-audited recommendations.
- Built **Listing Studio**, an AI-driven conversational listing flow that auto-fetches details from shared links, pre-fills fields, asks property-specific follow-ups, and takes native-language voice input via **Soniox STT**.
- Built **buyer and seller dashboards** for search history, shortlists, enquiries, and listings, with an in-app alerts feed backed by a queued, **suppression-list-aware email pipeline**.
- Built the **admin console** to approve listings against a Verification Score and manage builder projects through a **5-tier, citation-gated source-priority pipeline** with RERA document fetching.

Tab It Solutions (Clavel AI)

June 2025 – Mar. 2026

Backend AI Engineer – **IronShift** (Cloud Extension)

Remote – Irvine, CA 92618, USA

- Built **IronShift**, an **AI-powered VS Code extension** for cloud-infrastructure operations with streaming, human-in-the-loop approvals, and model routing.
- Built **credit and billing workflows** with automated deployments using **Stripe, Terraform, Kubernetes, and GitHub Actions**, supporting multi-cloud infrastructure operations.

Envint Services LLP

Dec. 2024 – Mar. 2025

Full Stack Developer

Remote – Mumbai, India

- Built a full-stack audit and financial reporting SaaS using **React.js, Node.js, and DynamoDB**, digitizing Excel-based workflows with centralized data management and role-based access.
- Developed **role-based workflows, analytics dashboards, and automated PDF reporting** for audit teams, and deployed the platform on AWS with EC2, load balancing, and CloudWatch monitoring.

Independent Product

HireXAI (AI Hiring Marketplace)

Next.js, Node.js, MongoDB, OpenAI

- For companies, built an ATS with **bulk CV import + AI screening, AI voice calling** for first-round screens, self-serve interview slots with auto Meet links, stage-wise automated emails, talent pool, and audit logs.
- For candidates, built a paid **mock-interview marketplace** with vetted interviewers on **LiveKit video**, recorded and graded by GPT with per-question feedback and ideal answers, plus career guidance and referrals.
- Integrated **PayU** (idempotent, double-booking-safe payments), **Google Calendar/Meet, Slack**, and **Deepgram** on **Next.js, Node.js, MongoDB**, with a 5-tier SaaS plan system and distributed job scheduler.
