Summary

Full Stack AI Engineer who builds and ships AI-integrated SaaS products end-to-end, from architecture and development to deployment and production delivery.

Education

JSS Academy of Technical Education

2021 – 2025

Bachelor of Technology in Information Technology, CGPA: 7.51

Noida, India

Experience

Deccanwave Labs (Vesper)

May. 2026 – Present

Founding Engineer

Remote – Hyderabad, India

- Built and shipped the **entire backend** for Vesper, a real-time social app with mood matching, WebRTC calls, rooms, and DMs, using Node.js, TypeScript, Prisma, Postgres, and Redis.
- Rewrote the **Redis matching engine** with batched sampling and pipelining, **cutting 60 round-trips per batch to 1**, and scaled Socket.IO horizontally via the Redis adapter.
- Built the **coin wallet and billing system** with idempotent, row-locked ledger transactions, ensuring **zero double-spend** across IAP webhooks and call billing, plus Cloudflare TURN and APNs VoIP/CallKit for reliable calls.

Tab It Solutions (Clavel AI)

June 2025 – Mar. 2026

Backend AI Engineer

Remote – Noida, India

- Built a **LangGraph-based AI agent** and 10K-line VS Code extension UI for IronShift, an AI cloud infrastructure copilot supporting streaming, human-in-the-loop approvals, model routing, and 25+ Marketplace releases.
- Built a **token-based credit and billing system** where 1 credit represented \$0.01 of spend at a 40% margin, integrating Stripe billing and seat-based Team plans to create a multi-seat revenue product.
- Built and deployed **/deploy and /audit workflows** generating Terraform/Kubernetes configurations and GitHub Actions from chat, with multi-cloud compliance checks and PDF export using GitHub API, Terraform MCP, and PyMuPDF.

Envint Services LLP

Dec. 2024 – Mar. 2025

Full Stack Developer

Remote – Noida, India

- Built a full-stack audit and financial reporting SaaS using React.js, Node.js, and DynamoDB, digitizing manual Excel-based audit workflows for **500+ companies** with centralized data management and multi-role access.
- Developed **role-based workflows** for clients, managers, and senior consultants, implementing **5+ core workflow stages** including dynamic questionnaires, submission reviews, approvals/rejections, feedback, and backend business logic using Node.js and DynamoDB.
- Built interactive analytics dashboards and automated PDF reporting, handling up to **1,000 submissions monthly**, and deployed the application on AWS with **EC2, load balancing, and CloudWatch monitoring** for scalable and reliable production workloads.

Projects

HireXAI – AI Hiring Marketplace [Live](#) | [Next.js](#), [Node.js](#), [MongoDB](#), [LangChain](#)

- Built a **company-centric hiring platform** for customized job posting, drag-and-drop candidate pipelines, shortlisting, team assignments, and centralized hiring management.
- Built **interview scheduling and collaboration** with Google Calendar/Meet, candidate communication, interviewer assignments, hiring analytics, and a **talent pool** for future hiring.
- Built **candidate and interviewer portals** for job applications, mock interviews, career guidance, interview practice, availability, and candidate management using **Next.js, Node.js, MongoDB, and LangChain**.

Technical Skills

Frameworks: React.js, Next.js, Node.js, FastAPI, LangChain, LangGraph, Celery, RAG, AI Agents

Languages: Python, JavaScript, TypeScript, HTML, CSS, SQL

Databases: MongoDB, PostgreSQL, DynamoDB, ChromaDB, Pinecone (Vector DBs)

Deployment: AWS EC2, AWS S3, Azure Web Services, Docker, CI/CD

AI Tools: ChatGPT, GitHub Copilot, Claude Code, Cursor, V0.dev

Achievements

- Regional Finalist (Top 20) in the 2022–23 Imagine Cup hackathon conducted by Microsoft.
